Why not let the technology you are scared of protect the ones you care about?

Welcome...
to the **future** of education

Educast: the new television content management platform for **schools, colleges & universities.**

Educast has been especially designed to complement **existing media courses** and allows students to take their content **direct to real television.**

Developed by internet protocol television specialist **Global Digital Broadcast** and using **Microsoft's** WMV & VC-1 codecs, Educast facilitates:

- **global** collaboration
- **live** production
- live **learning**
- **on-demand** education
- live **television**

Operating on a **secure platform** (a closed network), Educast uses state-of-the-art **age verification** software, two years advanced of any other verification system.

Educast will include: **educational programming** such as Discovery on-demand and Passion For The Planet; access to over **one million hours** of archive footage from ITN Source; and access to an **extensive library** of classic and historical **films.**

Educast is working with all current **regulators** in order to provide the most secure platform available and **welcomes contact** from any interested parties.
